March 9, 2009

Mr. Robert Zoellick, President  
The World Bank  
1818 H Street, NW  
Washington, DC 20433

Dear Mr. Zoellick,

Please allow me to extend sincere gratitude to you on behalf of the global membership of the White Ribbon Alliance for Safe Motherhood, an international membership coalition spanning 142 countries, for your time and efforts as a member of the High Level Taskforce on Innovative International Financing for Health Systems. This Taskforce, which will contribute to filling national financing gaps to reach the health Millennium Development Goals through mobilizing additional resources, increasing the financial efficiency of health financing and enhancing the effective use of funds, has been greatly needed for some time.

As you prepare for your Taskforce meeting in London on Friday, March 13<sup>th</sup> we are writing to express the importance of strengthening health systems with the specific goal of preventing maternal death and disability. Each year, more than half a million women lose their lives needlessly due to lack of basic health care, and more than half the world's women give birth without a trained health care provider. As you know, the commitment to reduce maternal mortality by 75%, outlined in Millennium Development Goal 5, remains off track. The critical investment that would improve this situation is investment in health workers and health systems able to deliver basic and emergency care.

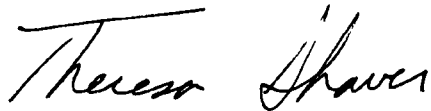

During this time of economic turmoil, more than ever, the need to invest in the lives of women and girls is essential, as was clearly articulated during the World Economic Forum at Davos in January. Last year, there was unprecedented attention and momentum on this issue, and growing understanding that maternal mortality is one of the most indicative measures as to whether a health system can deliver care for any one who needs it, including the most vulnerable. For this reason we ask that you prioritize maternal health in your upcoming meeting.

The White Ribbon Alliance for Safe Motherhood is part of a global Maternal Mortality campaign – mobilizing hundreds of organizations and thousands of individuals around the globe – with the following objectives:

- Establish a major new innovative financing mechanism to fund health systems.
- 20 countries to have financed health plans in place by 2010, to meet the WHO recommended levels of 2.3 workers per 1,000 people by 2015.
- Appointment by the UN Secretary General of someone on Maternal Mortality.
- Appoint national champions to mobilize action at a national level.
- Agree on, and develop delivery plans for, a small number of high impact interventions.
- Ensure maternal mortality is recognized as a key indicator of a functioning health system.

As our network continues to advocate for the reduction of maternal mortality and morbidity worldwide, uniting diverse and multi-sectoral partners to catalyze public support and create political will for systemic changes – we thank you for playing your part in working to ensure women will have access to life-saving care. When you make recommendations on the mix of innovative international financing mechanisms needed to deliver the extra resources required and promote international support for these recommendations to ensure they are implemented, please keep maternal health at their heart. Mothers are vital to the development of children and future generations. When mothers live, they give birth to healthy families, communities and nations.

Sincerely,

A handwritten signature in black ink that reads "Theresa Shaver". The signature is written in a cursive style with a large, sweeping initial "T".

Theresa Shaver, President & Executive Director

*On Behalf of the White Ribbon Alliance for Safe Motherhood Global Membership*
